The track is double the entire length of the line, of steel rails laid on heavy oak ties, which are embedded in a foundation of rock ballast eighteen inches in depth. THE SAFETY APPLIANCES

in use on this line well illustrate the far-seeing and liberal policy of its management, in accordance with which the utility only of an improvement and not its cost has been the question of consideration. Among many may be noticed

This instrument accurately measures the distance a person carrying it walks, showing the amount of daily exercise taken in and out of doors.

Its mechanism is a marvel of simplicity, and can be readily adjusted to any length of step. It is strong and durable, and the size of a small watch. Ladies, Professional and Business Men, Students, Pedestrians, Sportsmen, Farmers, Surveyors and others, will find it very useful. A Table accompanies each Pedometer, giving the number of steps taken in a mile, second, minute, hour and day.
